Deadlines

- 15.09.2017 – early registration and submission of 2-page extended abstracts
- 15.10.2017 – submission of full papers
- 15.11.2017 – conference programme

Registration Fee

The registration fee includes scientific programme, conference proceedings as well as accommodation and meals, banquet, excursion and the refreshments during coffee breaks.

	Regular fee	Reduced fee for IEEE members
Before 15 September 2017	1500 PLN/350 EUR	1400 PLN/330 EUR
After 15 September 2017	1700 PLN/400 EUR	1600 PLN/380 EUR

Further information

Detailed information concerning the Conference social programmes, payment account and preparation of 2-page extended abstracts and full papers will be included in the second and final announcements.

invite you to attend

9th International Conference

Electromagnetic Devices and Processes
in Environment Protection

ELMECO – 9

with 12th Seminar “Applications of Superconductors”
AoS-12

The purpose of the Conference ELMECO & Seminar AoS is to gather some recently developed and new aspects of electromagnetic and superconducting applications in environment protection. The events are focused on knowledge exchange in the field of electromagnetic devices and processes in environment protection and modern superconducting materials and devices. It will promote some practical and industrial applications related to the subject. The oral and poster sessions are intended. The official conference language will be English.

Publication

Extended abstracts (two pages) prepared according to the rules included in the attached file will be published in the Conference Proceedings prior to the conference.

Full papers will be evaluated by at least two reviewers (double blind). We intend to submit all positively reviewed works to the IEEE Xplore database.

Conference topics

The conference ELMECO-9 will include the following topics:

- plasma and ozone technologies to air, water, soil,
- phenomena in superconductors, superconducting materials, wires and tapes,
- energy saving superconducting devices (cables, magnets, fault current limiters SFCL, magnetic energy storage SMES, transformers, bearings, machines, SQUIDS) and their applications,
- electrotechnologies in agriculture,
- electromagnetic compatibility, influence of electromagnetic fields, noise and vibration on living organisms and environment monitoring,
- renewable energy sources to supply electrical devices and home power plants,
- computer aided designing of electromagnetic devices and processes,
- micro- and nanomaterials, magnetic materials,
- biomedical engineering,
- other related subjects.

Conference Venue

The Conference will be held in Nałęczów, a popular resort located 25 km from Lublin – one of the main cities in the eastern part of Poland, placed within the distance of 165 km from Warsaw. Further information on Nałęczów and the Conference Centre “Energetyk” are available at:
